

UBER RIDE DATA ANALYTICS PROJECT

OBJECTIVE:

Analyse Uber ride booking data to understand customer preferences, vehicle type distribution, and ride completion rates.

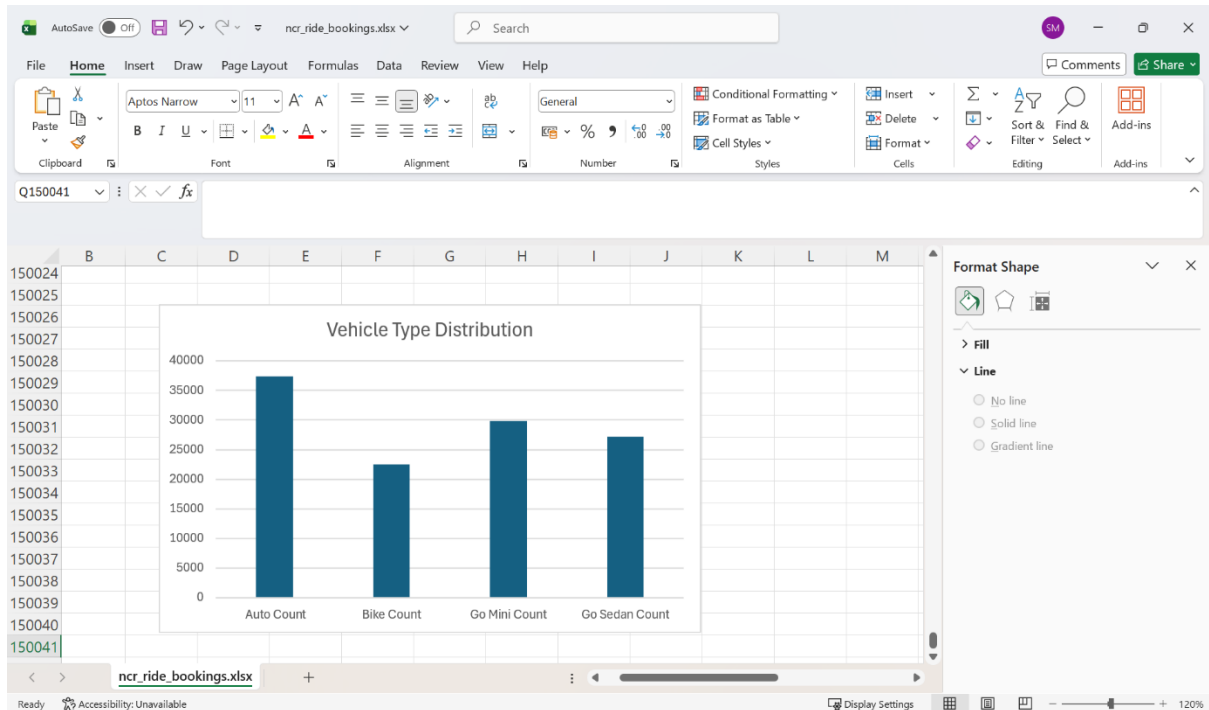

Dataset: 150,000 Uber ride records

Tools Used: Microsoft Excel

KEY FINDINGS:

1.VEHICLE TYPE DISTRIBUTION

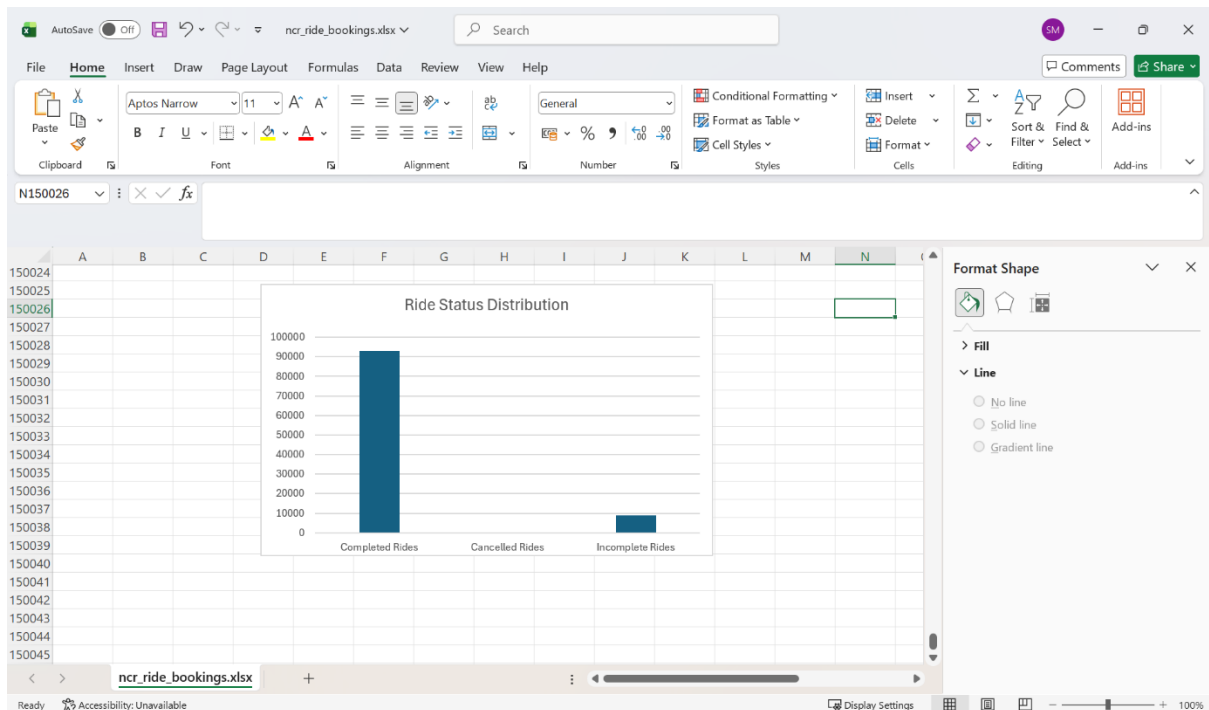

Key Insight :

Auto is the most popular vehicle type (37,419 rides - 25%)

Bike is the least popular (22,517 rides - 15%)

Go Mini and Go Sedan are equally popular (~27,000-29,000 rides each)

2. RIDE STATUS ANALYSIS

Key Insight:

93,000 rides completed successfully (62%)

9,000 rides incomplete (6%)

0 rides cancelled (0%)

High completion rate indicates good service reliability

3. FARE & QUALITY METRICS:

Average Fare: ₹8.46

Fare Range: ₹2 - ₹20

Average Rating: 4.64/5 stars

Average Distance: 508.30 km

Key Insight: Uber offers affordable fares with high customer satisfaction

CONCLUSION:

Summary:

Auto is the most demanded vehicle type

Service has high completion rate (62%)

Customer ratings are excellent (4.64/5)

Fares are reasonable for the distance covered
